Response to Amendment

Applicant's amendment was received and entered on October 6, 2005; however, prior to further examination, applicant is required to elect an invention from the restriction that follows:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 21, 22, drawn to a monitoring apparatus, classified in class 312, subclass 242.
- II. Claims 13-20, drawn to a method of monitoring environmental conditions, classified in class 73, subclass 23.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product does not require mounting to a wall, as stated in claim 13, and the process as stated in claim 19 does not require a cage product as stated in claim 1.

Art Unit: 3635

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
